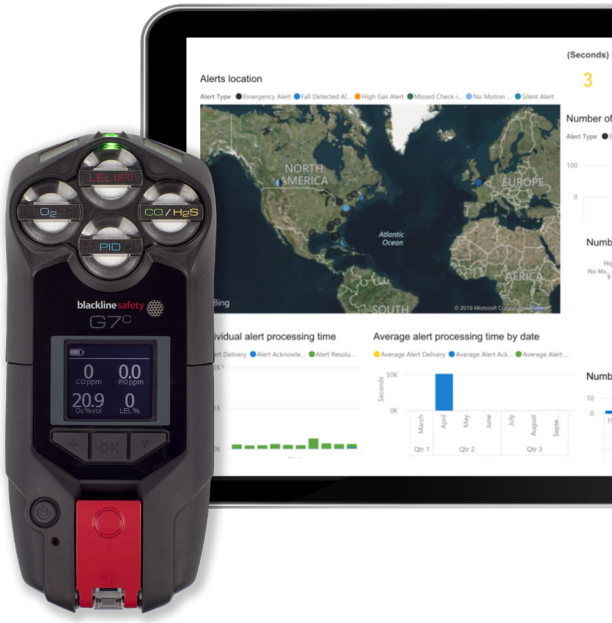
G7 MULTI-GAS

CONNECTED AND RELIABLE GAS DETECTION—FOR ANY SCENARIO

The wearable, intrinsically safe G7 multi-gas detector delivers peace of mind that your workers are protected and can get home safe. That's because with cellular-enabled cloud connectivity, integrated location technology and monitoring for up to five gases, you can view their safety status in real-time and take quick action if an incident or high-gas alert occurs.

Over the long term, automated analytics and comprehensive data insights from device use help you get in front of potential hazards, improve safety processes and boost compliance. G7's exclusive customisable modular design means you can easily expand functionality through a range of plug-and-play cartridges and gas sensors, reducing the cost and complexity of fleet management.



BUILT-IN CAPABILITIES:

- Real-time direct-to-cloud cellular connectivity, with optional satellite for remote locations
- GPS to locate people and devices quickly
- Lone worker, single-gas, multi-gas, or multi-gas pump protection
- Detection for up to five gases, with a portfolio of up to 20 gases to choose from
- Patented emergency SOS latch
- Automatic no motion, fall detection and missed check-in alerts
- Push-to-Talk (walkie-talkie) (optional)
- Two-way voice and text messaging (optional)

Blackline Safety protects 165,000 workers in 70+ countries

ALL-IN-ONE CONNECTED SAFETY SOLUTION

KEY BENEFITS

Comprehensive Gas Detection

- Modular, plug-and-play gas sensor cartridge system to meet your changing needs
- Choose from a standard, single-gas, multi-gas diffusion or multi-gas pump cartridge
- Alert for limits, time-weighted average (TWA), short-term exposure limit (STEL), high/low gas levels, bump tests, calibrations and related failures

Immediate incident response

- Communication options – including two-way voice communication, text messaging and push-to-talk capability -- to meet your diverse needs and keep your workers connected
- Optional 24/7 live monitoring and dispatch to exact location to ensure rapid response
- Manual, automatic, and time-based alerts and notifications to stay connected with the safety of each worker, in any situation

Improve safety and compliance

- Easy access to dashboards on device usage, calibration and bump testing and more to efficiently manage compliance
- Valuable insights for a deeper understanding of ways to proactively prevent incidents and improve safety processes and training
- Out-of-the-box or customisable analytics to identify actionable opportunities to understand gas exposure, boost efficiency, and manage compliance

REAL-TIME VISIBILITY

Direct-to-cloud cellular connectivity with data streaming to Blackline Live software platform for real-time visibility at your fingertips. Get up-to-date worker location and safety status information to take quick and informed action.
